

# PREMIUM CALF MILK REPLACER

Ngahiwi Premium CMR is formulated to optimise and accelerate calf growth. Ngahiwi Premium combines a well-balanced milk-protein & fat-level milk powder with probiotics, prebiotics, essential oils, a vitamin & mineral premix and a coccidiostat to give calves the best start possible.\*

## 'ONCE-A-DAY' FEEDING GROWTH METHOD

| Calf Age     | Volume per feed (200gm/litre water*) | CMR per feed | CMR per day |
|--------------|--------------------------------------|--------------|-------------|
| 0 - 4 days   | Colostrum fed only                   |              |             |
| 5 - 9 days   | 1.0L twice a day                     | 200g         | 400g        |
| 10 - 20 days | 2.5L once a day                      | 500g         | 500g        |
| 22 days +    | 3.0L once a day                      | 600g         | 600g        |

### ONCE-A-DAY TIPS

- Add CMR to 40° Celsius warm water and cool until 36° before feeding
- Feed in morning and use compartment feeders for two weeks
- Mix rate/concentration 200g/litre throughout rearing
- Calf weaned off milk at 65kg, when meal concentration is increased

## 'TWICE-A-DAY' FEEDING GROWTH METHOD

| Calf Age     | Volume per feed (150gm/litre water*) | CMR per feed | CMR per day |
|--------------|--------------------------------------|--------------|-------------|
| 0 - 4 days   | Colostrum fed only                   |              |             |
| 5 - 9 days   | 2.0L twice a day                     | 300g         | 600g        |
| 10 - 20 days | 2.5L twice a day                     | 375g         | 750g        |
| 22 days +    | 3.0L twice a day                     | 450g         | 900g        |

### TWICE-A-DAY TIPS

- Add CMR to 40° Celsius warm water and cool until 36° before feeding
- Feed in morning and evening - leave 8 hours between feeding
- Mix rate/concentration 150g/litre throughout rearing

## \* NGAHIWI ADDITIVES - THE COMPLETE CMR

Ngahiwi Premium CMR includes a comprehensive Premix with essential vitamins and minerals. Optimum health and growth are also promoted by the added inclusion of probiotics, prebiotics, essential oils and an anticoccidial.

### THE THREE Q'S OF COLOSTRUM

Colostrum intake directly affects a calf's health outcome and growth. Colostrum-deprived calves have little or no immunity to the many pathogens in their environment.

#### Remember the three Q's...

|                 |  |
|-----------------|--|
| <b>QUALITY</b>  | Feed calves with quality colostrum from mature cows    |
| <b>QUANTITY</b> | Minimum 3 litres over two feeds in first 6 hours       |
| <b>QUICKLY</b>  | As soon as possible, and at latest 6 hours after birth |

### TYPICAL PRODUCT ANALYSIS

|          |     |
|----------|-----|
| Protein  | 27% |
| Fat      | 21% |
| Lactose  | 41% |
| Minerals | 8%  |
| Moisture | 3%  |
